

Amendments to the Specification:

Please amend the specification at page 18, the paragraph starting on line 16 as follows:

Using the example format specifiers and data source types listed above and the algorithm outlined in [[FIGs. 5-8,]] FIGS. 3-6 the following example further illustrates generating a destination URL using a patterned URL and a request URL. In this example there are different paths for different languages as previously discussed. A request URL may be:

`http://r.office.net/r/rlidTOW?WebLang=1041.`
